About

Upcoming computer engineering graduate with experience with programming languages and game development for system development, hands-on experience in network configurations and installation for technical maintenance. Committed to adapting to new working environments and and able to learn new concepts quickly.

Skills

Programming Language
Python, C#, C++, Java, HTML, CSS, JavaScript

Multimedia Tools
Blender, Canva, Capcut

Soft Skills
Adaptability, Time Management, Flexibility, Responsibility, Self Development, Attention to Detail

Game Design
Unity, Pygame

Technical Skills
IT Support & Infrastructure, Software Testing, Network Security

Work Experience

Technical Support Intern, *IBMS Technology Phils. Corp* 07/2025 – 09/2025

- Assisted in maintaining network configurations and server operations.
- Supported end-users with hardware and software troubleshooting.
- Assisted various departments in maintaining network security by configuring remote routers and firewalls.
- Performed tests on newly installed hardware and software to provide components that interface correctly with each other and network.
- Participated in training sessions to enhance technical skills and knowledge.
- Installed access control systems and handled cable splicing in various locations.
- Troubleshot door lock systems and performed relay maintenance in service areas.
- Application of industry standards in installation of cabling systems; utilized star topologies in backbone systems
- Conducted research in equipment and materials to fulfill client's requests and technical requirements

Student Assistant, *Polytechnic University Of The Philippines* 08/2024 – 10/2024

- Addressed fellow students' inquiries regarding university policies and procedures, enhancing their understanding of institutional guidelines.
- Guided students in navigating university resources, facilitating their access to necessary support and information.
- Assisted professors with administrative tasks and classroom preparation.
- Provided administrative support such as filing, photocopying, scanning, faxing, and sorting mail.
- Organized and maintained office files, documents, and records.

- Oversaw office supplies inventory by ordering materials and tracking usage to ensure availability for staff and students.
- Set up audiovisual equipment for classroom presentations. and assisted with audiovisual equipment operation.
- Explained class procedures, lab policies and important dates.
- Provided computer software and hardware maintenance in classrooms
- Created orientation material and video presentation for students and faculty

Education

Bachelor Of Science in Computer Engineering, 10/2022 – 09/2026
Polytechnic University Of The Philippines Sta. Mesa, Manila, Philippines

- Major in: System Development
- Conducted research study entitled "Rizal Through Play: A 2.5 Dimensional Role Playing Game Approach To The Thematic and Historical Depths of Noli Me Tangere", a gamified educational tool to improve student engagement in studying classic Philippine literature
- Participated in: Digital Signal Processing Fair 2026 with entry for "Doppler Things", Technical Committee for INTERFACE: Bridging Core Computer Engineering Principles with Emerging Industry Practice Seminar, Technical Committee for Design and Project Research Defense

Certificates

Python Essentials I
Cisco Networking Academy
September 7, 2026

Awards

Best in Research Award for Perceptions of Junior High School Students of SFILBHSI - Main Campus on Effective Teaching Strategies Towards their Improved Academic Performance, 01/12/2021
Saint Francis Institute Learning and Business Highschool Inc.

With High Honors, *Saint Francis Institute Learning and Business Highschool Inc.* 01/12/2020

With Honors, *Saint Francis Institute Learning and Business Highschool Inc.*
2009-2020

Projects

Rizal Through Play: A 2.5 Dimensional Role Playing Game Approach to the Thematic and Historical Depths of Noli Me Tangere- Polytechnic University of the Philippines, *Unity Engine, Blender, C++, Web/Mobile Application, Firebase, Git* 11/2024 – 05/2026
A gamified educational tool to improve student engagement towards classic Philippine literature.

Doppler Things - Polytechnic University of the Philippines, 11/2025 – 01/2026
PyGame, Ultrasonic Sensors, Arduino IDE, Software Application
Gesture-controlled prototype detection of hand movements by analyzing real-time frequency shifts based on motion direction and proximity towards or away from ultrasonic sensor
